## SOFTWARE DEVELOPER

---

I'm a software developer at Saeloun Inc, with over 2 years of experience in web development. I've experience with Ruby on Rails, ReactJS. Over the course of my career, I've led a five member team to build an application from scratch. I contribute to Open Source and have contributed to Ruby on Rails.

---

## AREAS OF EXPERTISE

---

<i>Key Skills:</i>	Ruby, Ruby on Rails, Python, JavaScript, GoLang, Django, C, ReactJS, Tailwind CSS
<i>Databases:</i>	PostgreSQL, MongoDB
<i>Tools:</i>	Heroku, Postman, Test::Unit, RSpec, REST APIs, Kafka, Docker

---

## WORK EXPERIENCE

---

**Saeloun Inc** (September 2021 –present)

Software Developer

- **Wanderwhale**

Ruby on Rails, React

- Worked on configuration and deployment setup for the app.
- Worked on fixing production level bugs.

- **Miru**

Ruby on Rails, React, TypeScript, Tailwind, PostgreSQL

Miru is a time tracking and invoicing tool for small and medium sized businesses.

- Designed the database and the system architecture.
- Developed and maintained the entire web application.
- Managed team to build robust and scalable application.
- Worked on adding new features and fixing the bugs.
- Handled all the deployment process.

- **ActivateCare** (Via Saeloun Inc)

Ruby on Rails, React, PostgreSQL, Bootstrap

ActivateCare is a cloud-based CareHub™ that connects patients, families, care teams, and community services on the journey to health and well-being.

- Worked on adding new features and bug fixes.
- Worked on redesigning the patient summary.
- Worked on SDOH Referral tracking system.
- Tasked with implementing the custom reusable design components.
- Worked with transition of application from a hospital driven solution to community driven health solution.

**Sapaad Software Pvt Lmt** (August 2020 – July 2021)

Junior Software Developer

Ruby, Ruby on Rails, ReactJS, PostgreSQL, Golang

Sapaad is a SaaS company having a cloud based restaurant management point of sale system.

- **Sapaad POS**

Ruby on Rails, jQuery, Bootstrap, Kafka

- Worked on integrating GPay Food aggregator to the core application.
- Worked on multilingual translation.
- Developed a two level caching mechanism for fetching the menu items in a faster manner.
- Built Kafka mechanism for message broadcasting to all external dependent services.

- **Sapaad Direct**

Ruby on Rails, ReactJS

Sapaad Direct is a BYOD platform for walk-in orders. Customers can directly make an order with their own device by simply scanning a QR code.

- Worked on integrating PayTabs and PayU payment services.
- Built the API backend using Ruby on Rails from scratch.
- Worked on developing the frontend using ReactJS.

- **Sapaad DMMS**

Ruby on Rails, ReactJS, Redis, Kafka, Docker

Sapaad DMMS is a delivery manager application, for handling all delivery orders of a restaurant.

- Worked on both frontend and backend services.
- Built Kafka mechanism for data handling.

- **Sapaad Trial Manager**

Ruby on Rails, jQuery, PostgreSQL, Kafka, Docker

Sapaad Trial Manager is a trial application management system for the Sapaad sales team to track each customer trial application.

- Worked as lead on this project.
- Developed robust, scalable, and maintainable Rails applications, with high test coverage.
- Created the design and architecture.
- Managed overall project and delivered in three months.

---

## EDUCATION

---

**Providence College of Engineering, Chengannur, Kerala** (2016 – 2020)

*Bachelor of Technology (Computer Science & Engineering)*
